LOCAL-FIRST AI CREW

Build ambitious work without losing control

One inspectable project. One visible plan. Every output reviewable.

THE OPERATING PRINCIPLE

Nothing moves before the owner can see what will happen.

Preparation stays separate from execution, and every handoff leaves evidence.

A crew that stays legible

Moxcrew turns a complex request into an owner-visible production loop.

- Ground work in exact project sources
- Prepare actions before execution
- Keep versions, notes and evidence together

Pilot teams finish more of the work they start

Illustrative pilot dataset · owner review required
